PROFESSIONAL SUMMARY

Software Developer transitioning into Cloud & DevOps, backed by hands-on experience in Linux, networking, containerization, and cloud infrastructure. Strong track record of deploying containerized applications, automating CI/CD delivery pipelines, and managing cloud environments using Docker, GitHub Actions, Terraform, and AWS. Seeking a Junior DevOps / Cloud Engineer position to optimize deployment workflows, scale infrastructure reliability, and accelerate cloud automation.

TECHNICAL SKILLS

Cloud & Platforms: AWS (EC2, S3, IAM, VPC)
DevOps & CI/CD: GitHub Actions, CI/CD Pipelines
Containers & Orchestration: Docker, Docker Compose, Kubernetes (Basics)
Infrastructure as Code (IaC): Terraform (Basics)
Operating Systems & Networking: Linux (Ubuntu), TCP/IP, DNS, HTTP/HTTPS, SSH
Web Server & Reverse Proxy: Nginx
Scripting & Languages: Bash, Python (Basics), JavaScript
Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Junior Software Developer Dec 2024 – Present

- Worked closely with team tasks, handling server setups, deployments, and fixing deployment issues in an Agile team.
- Used Docker to make local and server environments match, preventing bugs caused by differences between computers.
- Helped senior engineers fix server errors, Linux file permission issues, and network connection problems.

DEVOPS & CLOUD PROJECTS

Secure FinTech Banking Platform Infrastructure

- Architecture & Scope:** Deployed a full-stack banking backend handling secure user-related CRUD data operations and account management routines.
- Cloud & Infrastructure:** Provisioned AWS EC2 instances running Linux (Ubuntu), configuring secure SSH access, security groups, and user privilege bounds.
- Containerization & CI/CD:** Containerized services using Docker and built automated GitHub Actions pipelines for build verification and deployment triggers.
- Networking & Ops:** Managed Linux file permissions, environment security secrets, and static networking configurations to guarantee service uptime.

ScaleTime – AI Meeting & Interview Management Infrastructure

- Architecture & Scope:** Deployed an intelligent AI-driven meeting and interview lifecycle management application focusing heavily on automated delivery.
- Cloud Automation & IaC:** Implemented continuous deployment workflows using GitHub Actions and Docker registries alongside Terraform (Basics) infrastructure definitions.
- Traffic & Reverse Proxy:** Configured Nginx as a secure reverse proxy to manage SSL termination, load balancing, and internal traffic routing.

EDUCATION & CERTIFICATIONS

- B.Tech in Computer Science and Engineering** – Dr. M.G.R. Educational and Research Institute (CGPA: 8.4/10)
- Certifications:** NPTEL - Database Management Systems | FITA - Frontend Development Using React
