

DINESH K

CLOUD & DEVOPS ENGINEER

Chennai, Tamil Nadu, India | dineshdeveloper21@gmail.com | +91 9597470304
Linkedin: [linkedin.com/in/dinesh-professional/](https://www.linkedin.com/in/dinesh-professional/) | Portfolio: kdineshportfolio.vercel.app

PROFESSIONAL SUMMARY

Software Developer transitioning into Cloud & DevOps, with professional software development experience and a strong foundation in Linux, networking, containerization, and cloud technologies. Hands-on experience building containerized microservices, CI/CD workflows, reverse-proxy configurations, and cloud infrastructure using Docker, Docker Compose, GitHub Actions, Terraform, and AWS. Seeking a Junior DevOps / Cloud Engineer opportunity to apply existing development experience while growing expertise in cloud infrastructure, automation, deployment, and reliability.

TECHNICAL SKILLS

Cloud & Platforms: AWS (EC2, S3, IAM, VPC)

DevOps & CI/CD: GitHub Actions, CI/CD Pipelines, Deployment Automation

Containers & Orchestration: Docker, Docker Compose, Kubernetes (Basics)

Infrastructure as Code (IaC): Terraform (Basics)

Operating Systems & Networking: Linux (Ubuntu), TCP/IP, DNS, HTTP/HTTPS, SSH

Web Server & Reverse Proxy: Nginx

Scripting & Languages: Bash, Python (Basics), JavaScript

Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Junior Software Developer

Dec 2024 – Present

- Collaborated in an Agile development environment, gaining direct insight into software release cycles, deployment bottlenecks, and production workflows.
- Introduced containerization workflows to standardize local development and testing environments, reducing environment-parity issues.
- Partnered with senior engineers to troubleshoot server configurations, application errors, and network-related deployment failures.
- Maintained code repositories and contributed to debugging features, ensuring smooth integration with existing codebases.

DEVOPS & CLOUD PROJECTS

Cloud-Native E-Commerce Microservices Infrastructure

Personal Project

- Designed and containerized a multi-service e-commerce application using Docker and Docker Compose to ensure consistent execution across environments.
- Configured Nginx as a reverse proxy and load balancer to securely route and distribute traffic efficiently to backend services.
- Built automated GitHub Actions CI workflows to execute build validation and test suites on every code push.
- Provisioned and managed AWS test environment infrastructure using Terraform (Basics), applying cloud security and networking concepts (VPC, IAM, EC2).
- Managed Linux-based environments, utilizing SSH, environment variables, and file permissions for service management and troubleshooting.

EDUCATION & CERTIFICATIONS

Bachelor of Technology in Computer Science and Engineering — Dr. M.G.R. Educational and Research Institute

CGPA: 8.4 / 10

Certifications: NPTEL – Database Management Systems | FITA – Frontend Development Using React
